PROFESSIONAL EXPERIENCES

AICHAT Jakarta, Indonesia

Software Developer Intern — Front-End Development Summer 2019

- Designed and developed front-end features for their web content management system (CMS) using HTML, CSS, Bootstrap, JavaScript and React/Redux
- Collaborated with back-end developers to integrate UI elements with server-side logic and learned data storage integration using Redis
- Revamped React code to follow clean architecture guidelines and improve readability and maintainability
- Utilized Git and SourceTree for version control and code collaboration
- Practiced Scrum and Agile methodologies in weekly sprints and daily standups

PERMIAS NASIONAL Seattle, WA

Junior Web Developer Summer 2018

- Created the organization's website with WiX and implemented HTML, CSS as needed
- Designed several UI views for the website that are implemented in the final product
- Worked closely with senior developers and communicated with executives for feedback and suggestions

COMPETITIONS AND PERSONAL PROJECTS

DUBHACKS UW 2019

- Developed a Java program that reads out any text in a book or image using Google Cloud Vision API and transcribe text to speech using Google Cloud Text-to-Speech API
- Hosted the backend on Google App Engine for the application in Android Studio
- Ongoing goal: Moving it to a smart glass or Microsoft HoloLens to hopefully be useful for the visually impaired

ANGELHACK SEATTLE 2018

https://github.com/jocelindarma/HealthNavigator

- Created a fully functioning Android app that allows people to request and give health products (such as tampons) by utilizing Google Maps API for maps and places, and Firebase console for database
- Designed multiple front-end mockups using Balsamiq and implemented it in Android Studio using Android XML components and Java
- Added a notification feature with Microsoft Azure Notifications and Google Cloud Messaging

NETWORKED HANGMAN

https://github.com/jocelindarma/Multithreaded-Hangman-Game

- Developed a TCP client-server system for players to compete in hangman with a shared leaderboard
- Client-side handles user events, Server-side handles inputs, leaderboard, and generates words for users
- Implemented in C++ using sockets
- Supports multiple users by multithreading with the use of pthreads

SKILLS

TECHNICAL SKILLS: Java, C++, Python, SQL, HTML5, CSS3, JavaScript, jQuery, Bootstrap, React, Git

SOFT SKILLS: Interdependence, Good communication skills, Team player, Critical and creative thinker
